

# Analysis of the heart weights of cats

Student Number: 2516212c

## Introduction

Experiments were conducted as part of research into “Digitails”, a heart medicine similar to toxins found in plants commonly known as foxglove. 144 domestic male and female adult cats were used in the experiments and they each had their heart weight in grams(Hwt) measured. This data, including the sex(Sex) of each cat, is analysed in this report.
